

Computer Assignment – 1

Assume that a set of n elements is represented as an array.

1. Let $A = \{1,2\}$, $B = \{x \mid x^3 - 6x^2 + 11x = 6\}$ Write a program to determine whether $A \subseteq B$
2. If $A = \{1,2,3\}$ and $B = \{2,3,4,5\}$ find $A \Delta B$
